Allowable Subject Matter

Claims 1- 17 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art, either singularly or in combination, fairly teaches or suggests applicant's claimed invention wherein applicant recites "performing an associative operation on the pixel values of each block to determine properties of the each block and providing a window defining a fixed size region and determining which portions of which blocks are within the fixed size region of the image" considering the definition offered by applicant through a) Webster's third new international dictionary,

Unabridged version, defining associative as "of, relating to, or being a mathematical operation that combines elements such that when the order of elements is preserved the result is independent of the grouping" and b) associative operation in the specification as 1) including "MINIMUM, MAXIMUM, AND and OR operations" and 2) as "having an associative quality. i.e., $(x \text{ op } y) \text{ op } z = x \text{ op } (y \text{ op } z)$ ".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure; US Patent 6,498,607, 6,448,968, 6,909,913, 6,646,647, and 5,856,829.
